

# Magnetic Cross Belt Separator (CBS)

Innovative Magnetic Technologies Inc. designed and manufactured Cross belt and In-line separators provide industry with a reliable and extremely effective means of tramp metal extraction. The core of the CBS is IMT's powerful suspended plate magnet. The CBS is manufactured with a heavy duty frame, vulcanized rubber cleated belt and off the shelf components. The shaft mounted helical worm gear motor is available in various voltages for simple hook up installation.

- **Self Cleaning** – self contained belt removes tramp from magnets surface
- **Easily retrofitted, Simple installation** – permanent magnet requires no electricity
- **Constant power** – permanent magnet requires no electricity
- **Low maintenance**
