

Innovative Magnetic Technologies Inc.

THE COMPANY

IMT's personnel offer over 35 combined years of permanent magnetic experience in industrial magnetic design and applications.

State of the art magnetic manufacturing equipment, ensures the quality standards of our magnetic products. In addition, our computer aided core designs, provide the most efficient and strongest magnetic cores for your application.

The IMT product line consists of Suspended Plate Magnets, Cross Belt Separators, Magnetic Head Pulleys, Plate Separators, (new) XHD In-Line Chute Separators, Vertical Magnetic Conveyors, Drum Separators and Magnetic Sweepers. IMT equipment is available in Ceramic (Ferrite) or Rare Earth (standard or high temp) configurations.

IMT has partnered up with an industry leader in the supply of Electro-Magnetic products, these product include but are not limited to Electro-Magnetic Separators, Eddy Current Separators and Heavy Lift Equipment.

We are excited about the magnetic innovations that IMT will introduce in the near future. As the developers of 5 internationally registered patents, we offer industry the next generation of patching, fastening and separation technology.

We remain focused on providing our clients with simple, cost effective solutions to their magnetic requirements. We strive to develop new concepts, products and applications for the heavy industrial market.

Call IMT's experienced and knowledgeable application specialists to review your magnetic requirements
